User Guide: Chat with Doc - Document Q&A with LLAMA 3.1

This guide explains how to use "Chat with Doc," a web application that allows you to ask questions about an uploaded PDF document and receive answers based on the document's content.

System Overview:

Chat with Doc utilizes a powerful AI model LLAMA 3.1 to analyze your uploaded document and answer your questions in an informative way.

Using Chat with Doc:

1. **Upload your PDF:**
   - Click the "Upload your file" button and select the PDF document you want to analyze.
2. **Ask your Question:**
   - In the text box labeled "Ask your Question," type your question about the content of the uploaded document.
   - The more specific your question is, the more precise the answer will be.
3. **Run the Analysis:**
   - Click the "Run" button to initiate the analysis.
   - The application will process your document, search for relevant information, and generate a response based on LLAMA 3.1's understanding of the content.
4. **View the Answer:**
   - If the analysis is successful, the application will display the answer from the LLAMA 3.1 model in a success message box.
   - The answer will be derived from the sections of the document that are most relevant to your question.
